SUBJECT: Project 35.511, Interim Study of USSR Shipyards in Economic Region VI.

1. This project contains nothing which requires statistical review. It is a collection of worksheets which will be of value chiefly to I/SH. If these worksheets are to be used as a basis for shipbuilding estimates for the region, or for the USSR as a whole, some documentation and statement of methodology is required.

2. I question whether publication as a Research Aid is necessary. Wouldn't ditto reproduction serve the same purpose less expensively?
